Dual-alarm AM/FM Clock Radio

Glossary

AM (radio) – Amplitude modulation

FM – Frequency modulation

Time - The numbers displayed on-screen, in HH:MM format (AM/PM)

Alarm - A sound that is triggered when the current time is the same time that is set by the user for the alarm

Radio - Device used to tune and listen to radio stations (AM/FM)

On/off (button) - Button when pressed turns the clock on or off.

Volume Control (slider) - Slider, when moved to the left decreases volume and increases volume when it is moved to the right

Alarm 1 (button) - Button when pressed prompts the user to enter a time to set Alarm 1

Alarm 2 (button) - Button when pressed prompts the user to enter a time to set Alarm 2

Radio station tuner (slider) - When moved, adjusts current radio station

On-screen display (OSD) - Display screen that shows the current time, if an alarm is on/off, any volume changes and radio station related objects when changed
